Small but Significant Change in Your Office Communications

Make calls by simply dragging a phone number, iPECS ClickCall

iPECS ClickCall is a smart application used to make communications simpler and easier when working with a PC.

All you need to do is drag a telephone number from any Windows application such as a web site, Windows document or any application running on your PC.
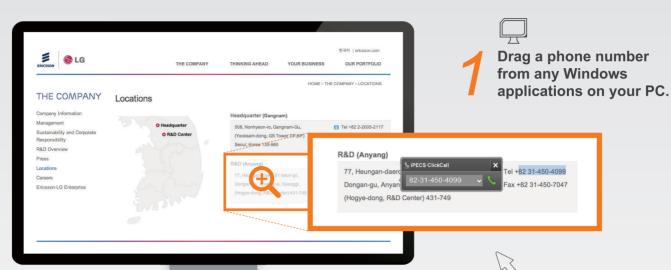

You don't need to memorize a phone number to make a call from a desktop phone. You can even reduce the chances of delays or mistakes made by pressing buttons when making a call in desktop phone.

You will be surprised and satisfied with the result of a very simple and small change.

- Best for the customers wanting simple CLICK TO CALL function

- Easy dialing to a selectable number by dragging it from any Windows application

- Simple installation: No special protocol, no dedicated server needed

How to use iPECS ClickCall

1 Drag a phone number from any Windows applications on your PC.

2 When iPECS ClickCall client pops up, click the handset icon.

iPECS-CM/LIK receives your request.

3 Now, calls are connected through your desktop phone.
